Summary

I'm a Front-End Developer living in Tartus, Syria. Holds a high school diploma, the scientific branch with a percentage of [90.52%]. I am studying at Tishreen University, Faculty of Informatics Engineering. Since the beginning of my journey with Front-End Developer I have become addicted to developing responsive websites. I spend more than 6 hours in front of a computer screen every day. I am using Visual Studio Code to write code with HTML5, CSS3 and JavaScript. I love coding things from scratch, but I can work with front-end frameworks like Bootstrap too.

Skills

- HTML5
- CSS3
- JavaScript
- Bootstrap
- Git & GitHub

Experience

- My account on Codeforces:
https://codeforces.com/profile/Ali_A_Tarmwsh
